DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17, 19-21 and 28-30 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1, 11, 19 and 28 contain allowable subject matter for at least the reason that the prior art of record fails to teach or fairly suggest an apparatus, method and system comprising first and second optical waveguides, with respective first and second charge layers, disposed in a semiconductor material layer and an insulating region disposed between the waveguides to provide a coupling region, the first charge layer and the second charge layer formed proximate to the insulating region, the coupling region having a first coupling length for a first polarization mode and a second coupling length for a second polarization mode of an optical beam directed through one of the waveguides as claimed. While Takabayashi and Thanyavarin teach coupling areas, they do not specifically teach charge layers as claimed. McCaughan (US 6,545,791) and Ade (US 5,347,601) teach coupling areas with electric field lines pictorially represented. The field lines are not charge layers, per se. An area that is filled by an electric field is not a "layer" as claimed, especially since the charge is not even, or distinctly layered, as it propagates. Kapon (US 4,869,569) is of interest since waveguides are made of layers of material. An electric field could then cause charge layers to build up within layers of the waveguide material. However, Kapon does not show a layer with charge built up enough to constitute a "charge layer". Kapon also fails to teach the polarization mode propagations as claimed and instead teaches filters to keep a single polarization mode within the device.

3. Claims 2-10, 12-17, 20, 21, 29 and 30 contain allowable subject matter at least by virtue of their dependency.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
